Board Communiqué.

ITFNZ Instructors and Members

Communication

Building on experiences over the last couple of months the Board has developed a new process designed to improve communication on key decisions and provide an opportunity for member's to express their views.

It is our view, as a Board, that following this process will lead to better decisions which we can all live with.

I would encourage you to provide your thoughts on each paper when they are released.

This is an opportunity for those who either agree or disagree with the Board to voice their opinion. I would ask that feed back be kept to the issues raised in each paper as we want to encourage robust critical feedback, both positive and negative.

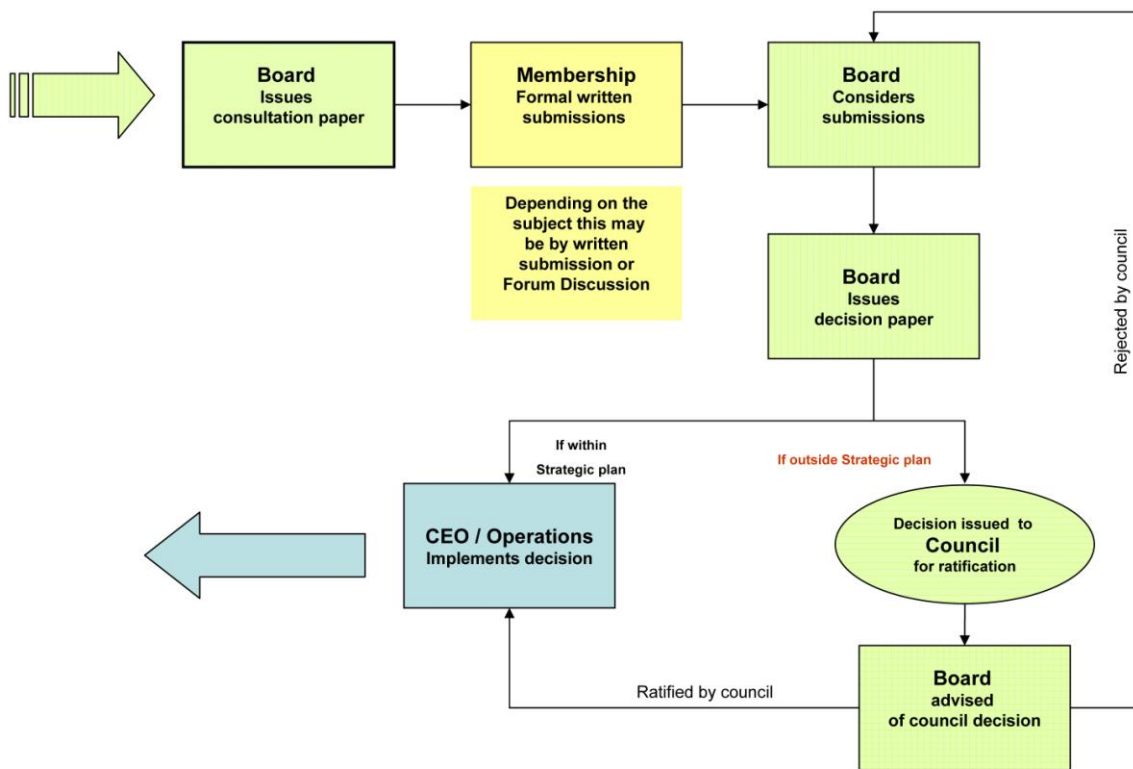

Dennis Burns
Chairman of the Board

Board Key Decision/Communication Process

The first of these papers calling for feedback on whether or not to adopt a new brand will be issued in the next few days, with another attaching the Proposed Strategic Plan to follow shortly thereafter.

All consultation papers will be emailed directly to Instructors (cc'd to Regional Directors) who will be asked to forward them to our members. The method of feed back either via Forum or written submission will be included as part of the paper.

Regards

Dennis Burns
